

Tosaf Color Service Germany

Additive and Color Solutions for the Plastic Industry

About Tosaf

For over three decades, Tosaf has been developing and manufacturing high quality additives, compounds, and color masterbatches for all thermoplastic polymers.

With the aim of providing for its customers' every need, Tosaf has continually grown and developed its offering, production capacity, and global reach. Tosaf is a global organization with over 1200 employees, 15 plants around the world, and more than 5000 customers in 50 countries.

Tosaf Color Service, Germany

A pioneer in the field of masterbatches, Tosaf Color Service Germany has been developing innovative products and services in plastics coloring since the early 70's. Our vast product portfolio includes standard colors, additives and combination solutions to fulfill your color requirements and your functional challenges.

Innovation as a Standard

Tosaf Color Service specializes in the development of unique and innovative color solutions, with high-level technical abilities, for a wide range of industries. We are one of the market leaders for masterbatches designed for the electronic and car industries.

Our experts have developed a variety of special-effect color masterbatches, which offer a cost-efficient and eco-friendly solution to your individual color requirements.

LED Effect

We provide high performance light diffuser masterbatches for PMMA and PC. Our color effects help hide light applications in a color harmonized manner.

Metallic Colors

Our new metallic masterbatch allows the production of injection-molded parts with a delicately structured, virtually streak free finish, even in critical areas.

Electromobility

We provide the highest quality in terms of electromobility colors with and without a laser marking additive, and use a wide range of UL listed colors.

Tailor Made Solutions

With dozens of production lines of different sizes, we are flexible enough to deliver orders for 5kg or 5 truckloads, with the same care and attention to detail.

Navigating the Complex World of Regulations

Our professional regulatory affairs team will guide you through the increasingly complex world of health & safety and other regulations.

A Dedication to Sustainability

We are leading the way in the development of colors and additives that can be used with recycled materials and biopolymers. These include biodegradable colors, NIR colors, recycling colors, and more.

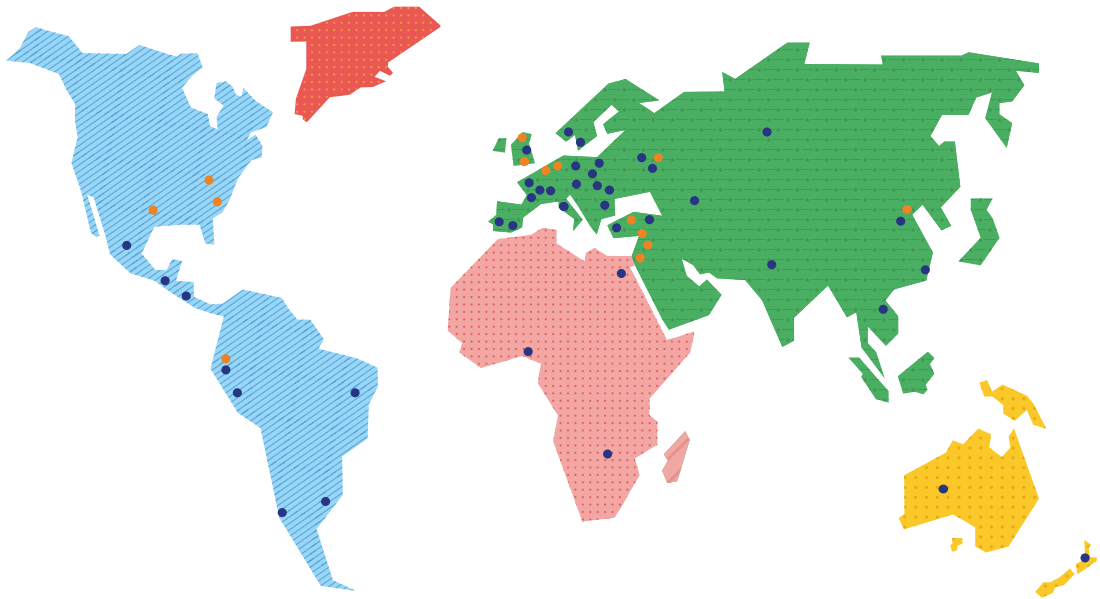

Efficient and Economical: The Universal Masterbatch®

Our universal carrier, which was developed internally at Tosaf Color Service, is one of the reasons for our ongoing market success. This patented carrier forms the basis for our Universal Masterbatch®, which can be used in a variety of polymers. The Universal Masterbatch® allows you to optimize your stock levels.

Aligned with Global Trends

At Tosaf Color Service, one of our goals is keeping up with the latest design trends. We work closely with designers, offer expert guidance on ways to achieve designs and color effects that lead to breathtaking results.
